

DEPARTMENT OF THE AIR FORCE  
20th FIGHTER WING (ACC)  
SHAW AIR FORCE BASE SOUTH CAROLINA

OCT 31 2016

MEMORANDUM FOR ALL SHAW AFB PERSONNEL

FROM: 20 FW/CC

SUBJECT: Shaw AFB Commitment to Environmental Protection

1. The 20th Fighter Wing embraces the goal of protecting the environment and our natural resources within their area of responsibility including Shaw AFB, Poinsett Electronic Combat Range and Wateree Recreation Area.
2. This commitment goes beyond my expectation for compliance with all environmental laws and regulations. It underscores the importance of employing a comprehensive framework for systematically managing our work center activities in a manner that continually advances our environmental stewardship. The Environmental Management System (EMS) Cross-Functional Team (CFT), chaired by the 20 MSG/DI, and guided by the Environmental, Safety and Occupational Health Council, provides this essential structure.
3. The CFT represents organizations of the 20th Fighter Wing and Shaw tenants through Unit Environmental Coordinators (UEC) who are appointed by their commanders. UECs are a vital conduit through which the CFT identifies the environmental, as well as human, impacts of our work center processes. In addition to setting objectives for continual improvement, the CFT also establishes and achieves targets for pollution prevention and reduction. In short, UECs directly support my "Compliance" and "Community" priorities.
4. To this end, all members of Team Shaw are encouraged to share their innovative ideas and expertise with the CFT through their UEC or my EMS Coordinators, Mr. Nicholas Muszynski (20 CES) and Ms. Joylee Cook (20 MXG). Successful implementation of the EMS program is a shared obligation at every level and for every mission or activity across Shaw. I ask everyone to stand with me and commit to protecting the environment and our natural resources in your daily work and to support the initiatives of the CFT when called upon.
5. Our commitment to environmental protection is the right thing to do, and it is critical for the long-term sustainment of the base. For anyone wishing to learn more about Shaw's EMS program, please contact either Mr. Muszynski at [Nicholas.Muszynski@us.af.mil](mailto:Nicholas.Muszynski@us.af.mil) or Ms. Joylee Cook at [Joylee.Cook@us.af.mil](mailto:Joylee.Cook@us.af.mil).

  
DANIEL T. LASICA, Colonel, USAF  
Commander
