

SENIOR AIRMAN GRAYSON REAMS

Electrical & Environmental Systems Specialist

Senior Airman Grayson Reams is an electrical & environmental (E&E) systems specialist for the F-16 Viper Demonstration Team.

As an E&E systems specialist, he is responsible for identifying, isolating and repairing malfunctions in the environmental control, power generation and aircraft antiskid systems.

He represents Air Combat Command, the United States Air Force and the Department of Defense at more than 20 air shows annually. His mission is to ensure the demonstration team has a quality aircraft available to perform a safe demonstration so that millions of spectators can see the capabilities of the F-16 Viper.

Senior Airman Reams enlisted into the Air Force in December 2018. He is from Rocky Mount, North Carolina, and enjoys playing golf and soccer.
